

Didier Najas
Profession Junior Full-Stack Software Analyst and Developer (Frontend & Backend)
+57 3164516626 | didiernajas2006@gmail.com | [LinkedIn](#) [Portfolio](#) [GitHub](#)
Bogotá, Colombia

Java Full-Stack Developer and Software Development Analyst in training, focused on building applications using Java, Spring Boot, REST APIs, and SQL databases. Experienced in developing academic and personal Full-Stack projects using layered architecture, service integration, and unit testing with JUnit and Mockito. Seeking my first professional opportunity to continue strengthening my technical skills and contribute value to software development projects. Strong analytical thinking, problem-solving abilities, adaptability, and teamwork skills.

EDUCATION

Politécnico de Colombia, Remote, Bogotá

Java Programming (Completed)

Jan 2025 – Feb 2025

SENA Bogotá, Remote, Colombia

Database Management and Creation (Completed)

Dec 2025 – Dec 2025

Generación Colombia Bogotá, Colombia, Remote

Junior Full-Stack Java Developer (Completed)

Mar 2026 – Jun 2026

Centro Agroindustrial del Quindío, Remote, Colombia

Software Analyst and Developer (In progress)

Feb 2025 – Aug 2027

WORK EXPERIENCE

Generation Colombia, Bogotá

Mar 2026 – Jun 2026

Academic Full-Stack Project Developer

- Developed and integrated more than 5 REST endpoints for communication between frontend and backend systems
- Designed a system with over 15 classes and domain entities applying layered architecture and separation of responsibilities principles
- Managed development through more than 50 documented commits using Git, GitHub, and Git Flow
- Implemented more than 20 unit tests with JUnit achieving over 70% code coverage

PROJECTS

E-commerce

Demo

Java, Spring Boot, Spring Data JPA, Bootstrap, REST APIs, MySQL

- Developed CRUD functionalities for product and user management.
- Integrated frontend and backend systems through REST APIs.
- Implemented data persistence using Spring Data JPA.

Weather Project

Demo

JavaScript, REST APIs, HTML, CSS y IA

- Integrated an external API for real-time weather information.
- Processed JSON responses and dynamically updated application data.
- Developed a user-focused interface and improved user experience.

JUnit Unit Test

Repository

JUnit - Java, Mockito y [GitHub](#)

- Developed unit tests to validate business logic.
- Used Mockito to simulate dependencies and perform isolated testing.
- Applied best practices to ensure code stability and maintainability.

SKILLS

| Frontend JavaScript CSS HTML Bootstrap | Backend Java Spring Boot REST APIs Spring Data JPA |
Tools Git GitHub Postman JUnit | Data SQL MySQL | Office 365 |
